

TRYST™

MULTI-EROGENOUS SILICONE MASSAGER

Tryst's semi-flexible silicone arms are designed to expand for a variety of uses. This flexibility allows Tryst to slide over the head of the penis to be worn as a c-ring, to be placed around a dildo or dong to add vibration, to grasp intimate pleasure zones such as a clitoris or nipples, and to comfortably stimulate internal areas such as a g-spot.

Three powerful motors provide a customizable experience for each partner. Both arms house strong motors that work independently from the third motor in Tryst's base.

TWO ARM MOTORS OPERATE INDEPENDENTLY FROM BASE:

- To operate both arm motors, press the top button located on Tryst's base.
- Each press of this top button cycles through 7 settings to provide vibration, pulsation and escalation.
- Simply hold the top button down for 3 seconds to turn off both top arm motors.

ONE BASE MOTOR OPERATES INDEPENDENTLY FROM ARMS:

To operate Tryst's powerful base motor, press the bottom button on Tryst's base.

- Each press of this lower button cycles through 7 settings to provide vibration, pulsation and escalation.
- Simply hold this bottom button down for 3 seconds to turn off Tryst's base motor.

TRYST'S MOTORS CAN BE USED TOGETHER OR SEPARATELY FOR CUSTOM PLEASURE!

Always begin with a clean, charged intimate product. Your Tryst is rechargeable and comes with a USB Cable for convenient charging. Average charging time is 70 minutes, and when fully charged usage time is approximately 90 minutes. To clean Tryst, spray with your preferred Doc Johnson Toy Cleaner or wash with mild soap and warm water. Do not submerge. Pat dry. Allow to dry completely before storing. Always remember to clean your Tryst before and after each use, and store separately from other intimate products.

Choose the best!

Silicone is considered the premium material in intimate products. Silicone is hygienic, hypoallergenic, and warms to your body temperature.

ARE YOU READY FOR A NEW INTIMATE LIFESTYLE EXPERIENCE?

Uniquely designed with both women and men in mind, Tryst provides a multitude of pleasurable options for both solo and couples play. From external vibration to internal stimulation, this multi-erogenous zone silicone massager allows for convenient handheld use and is expertly sized for unique and exciting c-ring experiences.

TRYST™

MULTI-EROGENOUS SILICONE MASSAGER

SUGGESTED USES:

A

Wear during intimate encounters with a partner or conveniently hold for direct stimulation.

B

Vibrating arms can embrace the clitoris for a unique, mind-blowing experience.

C

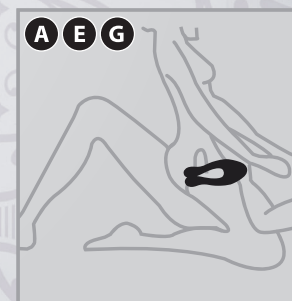

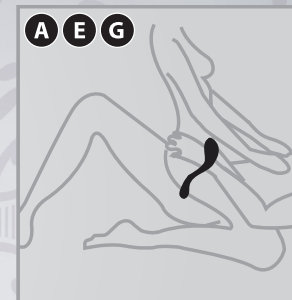

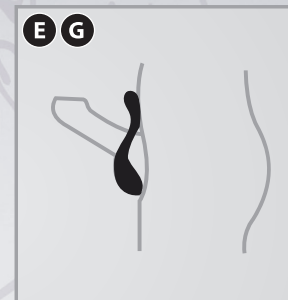

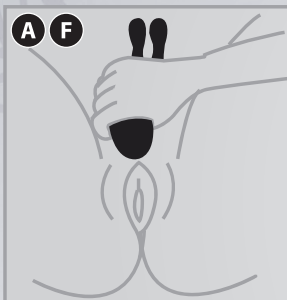

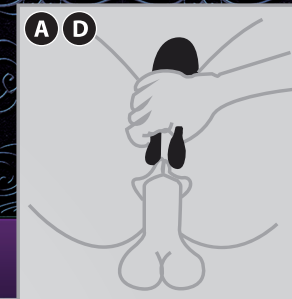

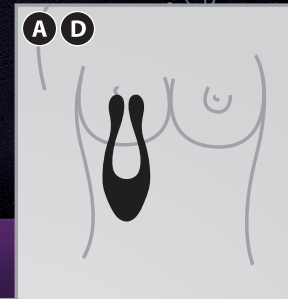

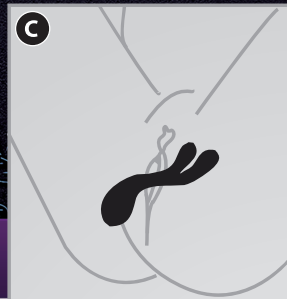

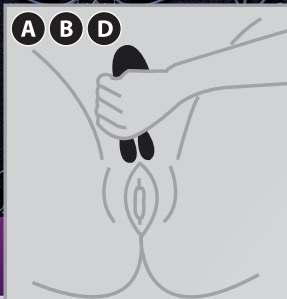

Insert vibrating arms for exact g-spot stimulation. Tryst's curved arms artfully mimic a "come hither" motion to provide intense pleasure during insertion.

D

Vibrating arms can clasp, caress and stimulate nipples or any erogenous zone.

E

Tryst can be comfortably worn as a vibrating c-ring for clitoral stimulation, testicle stimulation, or operate both vibrating zones to intensify both clitoral and testicle stimulation. Functions run independently to provide customized sensations for each partner.

F

Tryst's base can be used as ergonomic massager to stimulate intimate areas.

G

The wider base can be worn on top of the shaft for clitoral massage, or below the shaft for testicle stimulation. The semi-flexible arms can hug the testicles when worn below the shaft, or cusp the clitoris when worn on top of the shaft. Both directions provide unique pleasure options.

H

Can be used solo or with a partner.
