

**TO OPERATE VIBRATING FUNCTIONS:**

- Press  on either side to power on vibration for the corresponding cup. Vibration is activated when blue LED button lights up.
- Press  to cycle through vibration modes; each cup may be set to any mode independent of the other.
- To power off vibration, press and hold  for the cup you wish to turn off until blue LED goes out.

**CAUTION:** Do not overpump. If any pain or discomfort is experienced during use, stop pumping immediately, push the air release button, and seek medical attention as needed. Users with known medical conditions should consult a physician before use. Play responsibly.

**Warning for Vibrating Products:** To avoid injury or aggravation of pre-existing conditions, this product should not be used on swollen or inflamed areas or skin lacerations. No medical claims are warranted or implied by the use of this product.

Safe, sane, and consensual (SSC) is one of the values surrounding ethically acceptable behavior in BDSM, kink, and alternative sexuality communities. Safe means that the risk of activities should be understood by all participants, taking all precautions to prevent accidents or injury. Sane is to undertake activities in a sensible and sane state of mind, understanding the difference between fantasy and reality. Consensual means that all parties have freely and fully consented to the activity and were in a sound state of mind.

# SWELL

VIBRATING AUTO NIPPLE SUCKER

## Instructions for Use

**The Kink by Doc Johnson® SWELL Vibrating Auto Nipple Sucker can be used with both the suction and vibration features enabled, or either feature separately.**

**TO OPERATE PUMP:**

- Apply a **water-based** lubricant to the surface of the pump that meets the skin; this will help form the necessary seal to create suction.
- Gently press and hold each clear cup to the desired area. **Ensure that both cups are pressed firmly against skin, or suction will not form.**
- Press  to power on the pump's automatic suction. Pump is activated when blue LED button lights up. Within a few seconds, enough suction should form to keep the cups in place hands-free.
- Watch for the pumped areas to begin swelling. The wearer will also be able to feel the enlarging effects.
- When the area is visibly swollen or when the wearer is ready to stop, press and hold the **air release** button, gently remove each cup, and press  until blue LED goes out to power off suction.
