KIN-0691-08

Designed for intense dual stimulation, the silicone OptiMALE™ Duo C-Ring/P-Massager is engineered for precision control and ease of use. The c-ring delays ejaculation and prolongs erections while the p-massager simultaneously stimulates the prostate, offering an intense experience with multiple proven health benefits.

The soft, pliable c-ring and firm-yet-flexible p-massager optimize comfort, while the silicone Duo's slim joystick-style handle offers improved control and effortless removal.

To use: Grip the pull tabs at each side of the c-ring to stretch the ring open and insert the penis.

Apply a water-based lubricant or glide to the p-massager section, then relax and gently insert the end of the p-massager, allowing your body to adjust.

** For solo use we recommend lying on your side and bringing the knee that is on top up towards your chest for easy insertion.*

To remove: Slowly remove the inserted p-massager section using the attached handle, then grip the pull tabs at each side of the c-ring to stretch the ring open and remove it from the penis.

BENEFITS OF PROSTATE STIMULATION

- **Strengthens PC muscles**
- **Proven to reduce infection, inflammation, and cancer of the prostate**
- **More intense sexual pleasure and orgasms**

Cleaning and Maintenance: Silicone can be cleaned in a variety of ways. Spray with Doc Johnson® Toy Cleaner, wash with mild soap and warm water, boil for 3 minutes, or clean in the top rack of dishwasher. Allow to dry completely before storing separately from other toys in a cool, dry place.

For best results, use with OptiMALE™ Water-Based Lubricant.

Elevate Your Intimate Experiences

Caution: Prolonged and frequent use of penis enhancing devices may cause ruptured blood vessels, hemorrhage and hematoma formation. These devices can also aggravate existing medical conditions such as Peyronie's disease, priapism and urethral stricture. Penis enhancing devices should always be used with discretion.
