## About This Product

The iVibe™ Select iCome elevates the rabbit-style massager from toybox staple to multidimensional pleasure tool. The silicone iCome is an insertable massager with an anatomical curve for targeted G-spot stimulation and an exterior rolling clitoral vibe. The independently controlled shaft and clitoral motors of the iVibe™ Select iCome can be used at the same time or separately, with seven exciting shaft vibration patterns and two clitoral stimulator settings.

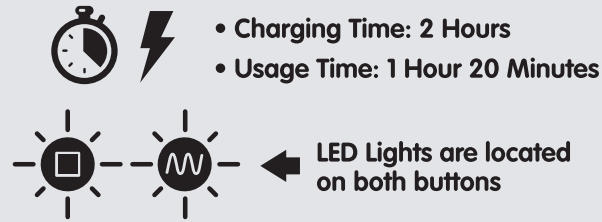

## Why Silicone?

Silicone is hypoallergenic and nonporous, making it the safest and most high-end material used in today's pleasure products. Our premium silicone is completely body-safe without compromising the beauty of each piece and has a smooth, velvety texture. When we created the iVibe™ Select line of products, we knew that this attractive and hygienic material was the only acceptable choice.

## Getting Started

For the best experience, we recommend cleaning and fully charging your iVibe™ Select iCome before the first use.

**To charge,** connect the USB cable included with your iCome into your preferred power source. Locate the small charging port at the bottom of your iCome and firmly push the charger jack into it. (The charging port may appear too small due to iCome's protective silicone exterior, but will stretch to accommodate the charger.)

**LED Flashing:** Charging

**LED Continually Lit:** Item is fully charged

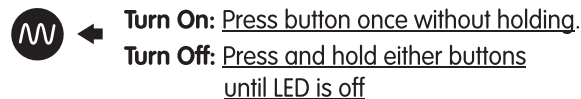

**LED Off:** Charging Cable Detached

## Using Your iVibe™ Select iCome

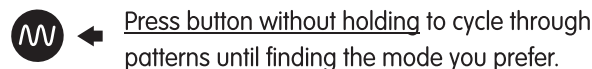

iCome can be used with both or either of the separately-controlled motors enabled, making a number of stimulating combinations possible. Many users find that their iVibe™ experience is improved with the use of a water-based lubricant.

**Do not use the iVibe™ Select iCome with oil-based or silicone-based lubes.**

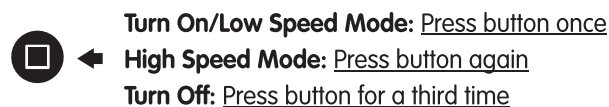

### To Turn On/Off iCome's Powerful Vibrations

### To Change the Vibration Pattern

### To Activate the Rolling Motions of your iCome's Clitoral Stimulator

## Care and Maintenance

Proper cleaning and storage of your iVibe™ Select products are essential for your continued enjoyment.

**To clean,** spray with Doc Johnson® Toy Cleaner or wash with mild soap and warm water and wipe clean, avoiding iCome's charger port. Do not submerge. Allow your iCome to dry completely before storing separately from other toys in a cool, dry place. (Doc Johnson® Toy Cleaner not included.)

**When storing,** ensure that your iVibe™ Select product does not come into contact with other toys. Keep away from extreme heat, cold, and moisture. Use iVibe™ Select products with water-based lubricants only; oils and silicone-based lubes will degrade the material of your iCome.

**WARNING FOR VIBRATING PRODUCTS:** To avoid injury or aggravation of pre-existing conditions, this product should not be used on swollen or inflamed areas or skin lacerations. No medical claims are warranted or implied by the use of this product.
