

Warm Toys For Your Hot Spots

* Also available in purple

"The vibrating Doc Johnson iVibe Select iWand has a warming feature that heats it to an erotic, body-safe temp."

From toys that heat up to lubes that yield warming sensations, the latest trend in pleasure products is *muy caliente*. And that's a good thing, since anything chilly can restrict blood flow, stalling an orgasm (or relegating it to a glacial pace), says Cindi Buxton, a naturopathic physician in Seattle. Not tonight! Spice up your sexy time with these sizzling playthings.
