

DOC JOHNSON

# iVibe<sup>™</sup> select iRing

## About this Product

The iVibe Select iRing is designed specifically with couples in mind. It's crafted in luxurious velvet-touch silicone with 10 vibrating functions and conveniently recharges with the included USB cable. The vibrating base is angled, specifically to maintain clitoral contact during penetration. Wearing the cock ring delays ejaculation and prolongs erection.

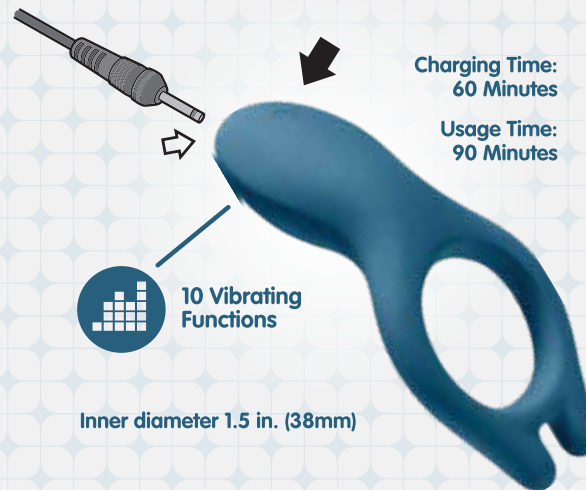

## Why Silicone?

Silicone is strong, hypoallergenic, and nonporous, making it the safest and most high-end material used in today's pleasure products. Silicone is also uniquely versatile, offering the widest range of stretch and firmness without compromising beauty, durability, or its velvety-smooth feel.

## Getting Started

For the best experience, we recommend cleaning and fully charging your iVibe Select iRing before its first use.

To charge, connect the USB cable included with iRing into your preferred power source. Locate the small charging port on the base of the iRing and firmly push the charger pin into it. The charging port may appear too small due to iRing's protective silicone exterior, but it will stretch to accommodate the charger. Your iRing will fully charge in 1 hour for a battery life of 1.5 hours.

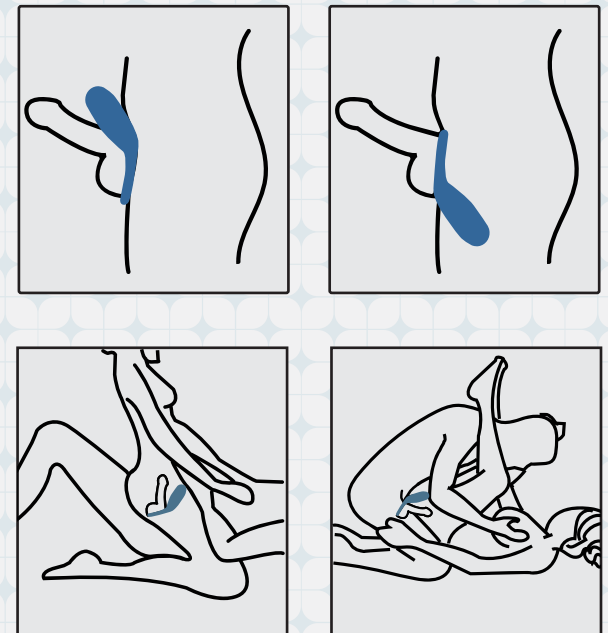

## Using your iVibe Select iRing

To turn on iRing's vibrations, press  at the base of the toy. Press repeatedly, cycling through vibration modes, until you find the feel you prefer. When you are done, hold down  for 3 seconds to turn iRing off.

## Features

iRing has 10 vibrating functions in its base, which is designed to maintain clitoral stimulation during penetration.
