

**Better Skin Equals
Better Sex**

The skin is the body’s largest organ, so taking care of it is a major factor in keeping every part of you healthy and energized. Every personal care product in the OptiMALE™ line is formulated to not only improve your sexual experience, but to nourish and strengthen your skin to keep you looking and feeling good where it counts the most.

To develop this line, we brought in ingredients like aloe vera, chamomile extract, tea tree oil, and vitamin E to clarify pores, boost new cell growth, and prevent signs of aging so you’re always at your best.

Revitalize and Refresh

Doc Johnson's top-selling OptiMALE™ brand presents everything today’s man needs to be his best in this line of naturally-derived products. Each of these creams, sprays, and glides are specially formulated to promote your sexual health and wellness.

Every item in Doc Johnson's OptiMALE™ line of personal care and sex-enhancing products is designed to enhance masculinity and attraction.

The OptiMALE™ personal care collection for men is safe for sensitive skin and made with nourishing natural ingredients.

OptiMALE™ Personal Care Products

- **So Dry**
Lotion-to-powder solution that prevents sweat, chafing, and odor
- **So Hard**
Desensitizing formula for greater stamina and control, available in Spray or Cream
- **So Big**
Erection-plumping cream to enhance sexual performance and maximize pleasure
- **So Smooth**
Skin-soothing shaving cream that prevents irritation and slows hair regrowth
- **So Fresh**
Deodorant spray that enhances pheromone production; safe for whole body
- **Pher-Moan**
Odorless, flavorless enhancement gel that intensifies pheromone potency
- **Lubricants**
Multi-purpose lubricating formulas in your choice of water-based, silicone, or hybrid

Scent is Essential

The way a man smells can make or break his chances of closing the deal in the bedroom. Earlier this decade, a team of researchers at Oxford University asked a group to rate the attractiveness of men based on headshots while filtering in scents they’d rated as pleasant or unpleasant.

Every time, participants rated the same men as unattractive when their photos were shown with bad smells and as very attractive when associated with clean air and masculine scents.

That’s why we designed every OptiMALE™ personal care product with fresh, subtle fragrances to keep you smelling great and odorless formulas that encourage your natural pheromone production.

The Facts on Pheromones

- Pheromones are airborne scent molecules that the body naturally produces to promote arousal.
- When detected, pheromones produce changes in mood, heart rate, breathing, and body temperature.
- Pheromones have no detectible scent or taste
- OptiMALE™ Pher-Moan Gel and So Fresh spray stimulate and enhance your body’s own pheromones to boost sexual interest and excitement.
