

About SECONDSKYN™

SECONDSKYN™ silicone is an amazingly soft, flexible silicone that warms to the touch and molds to your most sensitive areas. Warming, vibration, and other effects are effortlessly transferred via SECONDSKYN's™ liquid-smooth cushioned surface and interior. This material offers the same hygienic and hypoallergenic features of all pure silicone products, with an extra-squeezable lifelike feel.

Cleaning and Storage

Spray your OptiMALE™ Silicone Warming Stroker with Doc Johnson® Toy Cleaner or wash with mild soap and warm water. Do not submerge. Allow to air-dry completely before storing separately from other toys in a cool, dry place. Use with water-based lubricant/glide. ®Doc Johnson® Toy Cleaner sold separately.

Doc Johnson's OptiMALE™ Silicone Warming Stroker is a USB-rechargeable masturbator featuring 10 vibration modes and a warming feature that gently heats the SECONDSKYN™ silicone interior to 98.6° F (37° C) in just 5 minutes. It can be used at any stage of arousal from flaccid to erect, and should be used with water-based lubricants only; oils and silicone-based lubes will degrade the materials and shorten the life of your product.

▶ To Turn Vibrations On/Off:

- Press and hold  until the button lights up and the product begins to vibrate.
- Press and hold  again to power off. This feature can be used with or without the warming feature.

▶ To Change Vibration Pattern:

- Press  without holding.

▶ To Turn Warming On/Off:

- Press and hold **H** until the button lights up and the product begins to heat.
- Press and hold **H** again to power off. This feature can be used with or without the vibrating feature.

▶ To Charge:

Plug charger into a USB power source and attach to the stroker's metal charging contacts.

Charging Time: 2 hrs / Usage Time: 1 hr
