To Assemble Product for Use:

- Make sure the tabs on the base of your silicone attachment are aligned to the notches in the silicone front piece of your harness.
- Place the attachment behind the silicone front piece and push the tip of the attachment through the large hole. For larger attachments, it can also be assembled by inserting through front of harness.
- Press the attachment's tabs into the front piece's grooves until they push all the way through and lock in place.
- Use multiple snaps to adjust harness to your ideal fit.

Cleaning and Storage:

- Disassemble harness completely by pressing down on attachment tabs to separate it from the silicone section, and undo the snaps to remove the elastic waistband.
- Clean each piece according to individual instructions:

Elastic Waistband: Hand wash with mild soap and warm water and lay flat to dry.

Silicone Harness and Hollow Attachment: Spray with Doc Johnson® Toy Cleaner, wash with mild soap and warm water, boil for 5-10 minutes, or clean in top rack of dishwasher.

Allow each piece to air-dry completely before storing separately from other toys in a cool, dry place. Use with water-based lubricant/glide. Doc Johnson® Toy Cleaner sold separately.
